

26th September 2024

Dear Parents,

School Strategy 2024 – 2025

Please find attached a brief strategy letter that outlines the vision, mission and core values of the school including the attributes of a 'True Forester'. The final section looks at the key themes from our School Progress Plan that as a staff we will be focusing upon this year.

Overarching Theme

To celebrate the schools centenary year through a multitude of formats throughout this academic year.

Theme 1 - Independent Learning

To incorporate and build on the success of our collaborative learning strategies across the school to inspire and deeply embed the strength of mind for all pupils to become independent learners.

Each key stage and class already have their own set ups and methods for encouraging independent learning, so we will be focusing on building on these this year to ensure these remain robust in preparing our pupils for the modern day world.

Theme 2 – Our Centenary Year

We are incredibly proud of the school's history and recently shared the Centenary Planner for this year. All staff have been involved in the planning as well as the Parents' Association.

We hope to have included a mix of formal occasions and informal celebratory events that allow all pupils, parents and staff the opportunity to mark the historic year.

These initiatives will hopefully enable our children to be the best learners they can be, with schemes and facilities in place to individualise their progress, attainment and next steps whilst celebrating their many artistic achievements in a safe, secure and happy environment.

We will provide regular updates throughout the year on these themes on the school website, newsletters and social media.

As ever, we thank you for your continued support.

Yours sincerely,

Graeme Booth
Headmaster
