

27<sup>th</sup> November 2025

Dear Parents,

We are pleased to share some exciting developments taking place at Forest this year.

### **New AstroTurf Sports Pitch**

We will be installing a brand-new astro turf surface to replace the current netball court. This upgrade will provide a safer, all-weather pitch that can be used for a wide range of sports throughout the year. We are also adding a new dedicated storage building to accommodate the ever-growing range of equipment used across our sporting activities.

In addition, a freshly tarmacked spectator area will be installed beside the astro turf, enabling us to continue hosting fixtures and events with local schools in a more comfortable and accessible environment.

The work will start in the final week of this term. Full risk assessments will be in place and children, parents and visitors will be notified of any changes in access points and permitted zones.

Thank you to the Parents' Association who have kindly supported us in this rather vast project.

### **New Upper School Boys' Toilets**

Another significant improvement will be the complete refurbishment of the boys' toilets for Years 3 to 6. As this facility is located within an old barn building, all fittings need to be custom made. The entire space will be stripped out and rebuilt, with installation scheduled for the Easter holidays in 2026.

We remain committed to investing in the school so that we can further enhance pupils' learning and development. We are truly excited to see the new astro turf completed and look forward to it being used regularly by all our pupils.

Yours sincerely,

Graeme Booth  
Headmaster
